- OPTIONAL DEPLOYMENT ON MICROSOFT SHAREPOINT OR MICROSOFT DYNAMICS BUSINESS PORTAL

ReQlogic™ is the Leading Browser-Based Employee Productivity Suite for Microsoft Dynamics®.

ReQlogic provides solutions for eProcurement, Requisitions, Invoices, Expense Reports, Time Tracking, and Advanced Workflow; specifically designed for Microsoft Dynamics AX, GP, NAV, SL.

REQLOGIC TIMESHEET MODULE

ReQlogic's Timesheet module enables employees to enter timesheets using ReQlogic's user friendly browser interface. Timesheets can be routed to any number of reviewers based on dynamic routing policies. For example; transactions can be automatically routed to project managers, project business managers, employee managers, and others. ReQlogic's advanced workflow engine can use any criteria to determine an approval path, such as project, cost category, bill type, position, department, pay code, hours, daily totals, project customer and any other field in related tables. Approved Timesheets create corresponding Employee Timesheet records in Dynamics GP.

Whether tracking project time is crucial for billing, or cost analysis, the timesheet module enables you to do so within a fully integrated solution.

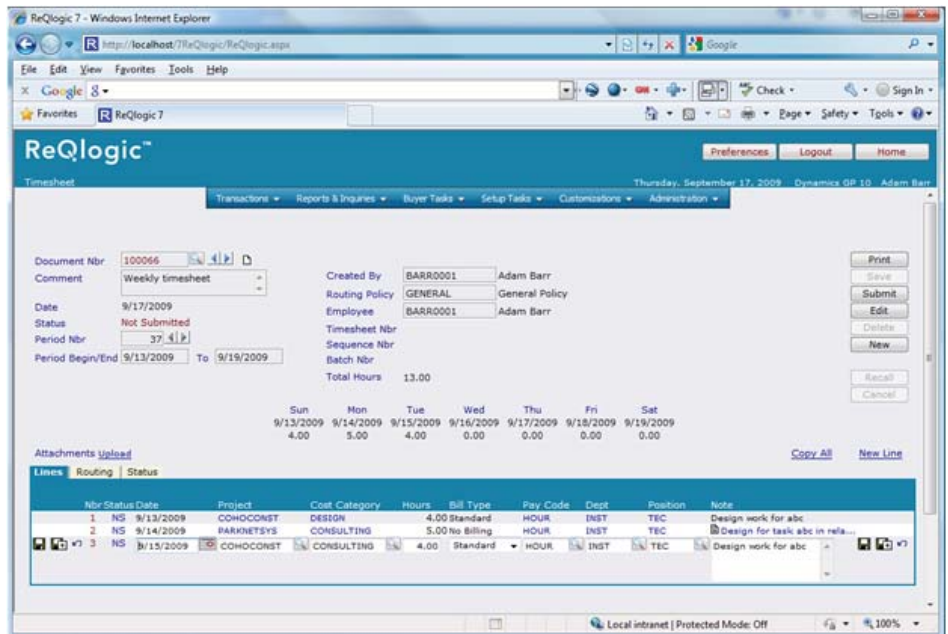

FIGURE 1: TIMESHEET

ADDITIONAL FEATURES:

- Restrict who can change the default Bill Type, Pay Code, Position, Department
- Supports billing notes
- Add new fields to track additional information on header and line
- Easily copy a previous timesheet to the current period
- A number of reports and inquiries are available
- In conjunction with ReQlogic Mobile, users with web-enabled phones (e.g., BlackBerry) can review status while out of the office. Reviewers can approve/reject and enter comments through their mobile devices
